Subject:

Sequence search of Application NO: 09/727,739

Please do a standard search on:

(i) SEQ ID NOS: 15 and 18 against the interference amino acid databases;

(ii) SEQ ID NOS: 17 and 19 against both commercial and interference amino acid databases.

Thank you very much!

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     US-08-648-322-11

US-08-648-322-11

Sequence 11, Application US/08648322

Patent No. 6074872

GENERAL INFORMATION:

GENERAL INFORMATION:

APPLICANT: Ge Lecea, Luis

TITLE OF INVENTION: COMPOSITIONS AND METHODS

NUMBER OF SEQUENCES: 24

CORRESPONDENCE ADDRESS:

ADDRESSEE: THE SCRIPPS RESEARCH INSTITUTE

STREET: 10666 No. 6074872th Torrey Pines Road, TPC-8

CITY: La Jolla

STATE: California

COUNTRY: US

ZIP: 92037
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Query Match

                                                                                                                   COMPUTER FACABLE FORM:

MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/648,322
FILING DATE:
CLASSIFICATION: 435
ATTORNEY/AGENT INFORMATION:
NAME: Fitting, Thomas
REGISTRATION NUMBER: 519.0
TELEPHONE: (619) 554-2937
TELEPHONE: (619) 554-6312
INFORMATION FOR SEQ ID NO: 7:
SEQUENCE CHARACTERISTICS:
LENGTH: 29 amino acids
TYPE: amino acids
TYPE: amino acids
TOPOLOGY: linear
MOLECULE TYPE: Protein
FRAGMENT TYPE: C-terminal
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         COMPUTER READABLE FORM:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Characterization
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Owatostatin-14 precursor - laughing frog

NiAlternate names: PSS1 protein
C; Species: Rana ridibunda (laughing frog)
C; Date: 11-Apr-1997 #sequence_revision 09-May-1997 #text_change 16-Jul-1999
C; Accession: JC6166
R; Tostivint, H.; Lihrmann, I.; Bucharles, C.; Vieau, D.; Coulouarn, Y.; Fournie: Proc. Natl. Acad. Sci. U.S.A. 93, 12605-12610, 1996
A; Title: Occurrence of two somatostatin variants in the frog brain: Characteriz: A; Reference number: JC6166; MUID: 97057290; PMID: 8901629
A; Contents: brain
A; Accession: JC6166
A; Molecule type: mRNA
A; Residues: 1-115 < TOS>
A; Consorted: This protein acts both as a neurotransmitter/neuromodulator and a ho; C; Genetics:
A; Genetics:
A; Genetics:
C; Superfamily: somatostatin
C; Superfamily: brain; hormone
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         KOELAKYF
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        lels

A28968
Somatostatin I precursor - crab-eating macaque
N;Alternate names: preprosomatostatin
N;Contains: somatostatin 14 (SS-14); somatostatin 28 (SS-28)
C;Species: Macaca fascicularis (crab-eating macaque)
C;Date: 30-Jun-1989 #sequence_revision 31-Jan-1997 #text_chan
C;Accession: A28968
